

# MEDICAL NEUROSCIENCE GRADUATE CERTIFICATE

## Is the Medical Neuroscience Graduate Certificate Program right for you?

- Are you taking a year off before entering graduate or professional school but would prefer to avoid a full academic break?
- Would you like to enhance your academic standing prior to application to graduate or professional school?
- Are you looking to gain advanced academic credentials to compete for a promotion?
- Are you currently working in a science field but would like to move to a neuroscience-specific position?

**If so, the Medical Neuroscience Graduate Certificate Program can help you reach your goals!**

### Who should apply?

The program is aimed at students interested in applying to graduate or professional school as well as individuals working in the pharmaceutical or medical device industries.

### Why this program?

The health care field is changing with new medical research advancing scientific knowledge at a rapid pace.

### Certificate goal

Our program aims at helping students to navigate developments in the field of neuroscience.

**Thank you for your interest in our program!** For more information
